Firmware Release Notes GIS

25 June 2009

Scope

The new operating system firmware version 5.26 is provided for no cost to current MobileMapper CX users.

Important Notes:
- Please note that your applications installed on MobileMapper CX and associated activation codes will be erased from the device after OS FW upgrade thus you will have to install and activate them again after this upgrade.
- It is recommended to upgrade the MobileMapper CX eBoot to the latest version (2.5) if it is not yet the case.

Upgrade procedure

MobileMapper CX OS version 5.26:
- Copy OS image (**NK_526.nbX**) to SD card
- Tap **My Computer\Windows\OSLoader.exe**
- Select **\SD Card\NK_526.nbX**
- Tap **OK**
- At the end, exit **OSLoader**
- Tap **My Computer\Windows\restoreFactorySettings.exe**
- Select **Restore factory settings** at next boot
- Tap **OK**
- Reboot the receiver
