## New MobileMapper Software

### Product concerned

Product Name: **MobileMapper 6**

Product Family: **GIS**

#### 1. PURPOSE

New *MobileMapper Software* for MobileMapper 6, will be released this week.

#### 2. DESCRIPTION

Ashtech is introducing its *MobileMapper Software: MobileMapper Field and MobileMapper Office*, a new GIS and Mapping software for MobileMapper 6. This new application provides a brand new user interface with a similar look and feel for both: Field and Office software modules. It adds to currently available features and options, several new functions and enhancements:

MobileMapper Field SW:

- Laser Technology range-finder interface
- Altitude and points position (coordinates) information display
- Possibility to delete collected feature
- Time stamp as an attribute
- Attribute as a label for collected features
- Antenna height support
- PDOP filter
- Possibility to collect multiple features in parallel
- DXF job format support
- MIF and CSV layer format support

MobileMapper Office SW:

- Export to CSV and KML (Google Earth)
- Raster map support (import and display)
- On-map distance measurement tool
- 24 hours period for reference raw data search
- Quality control and indication on post-processed vectors
- PDOP filter
- Picture and voice attributes automatic link
- Internet proxy support

Please refer to the revised price list on the Dealer Web Site for new pricing information.

Please note, this new software is provided as a free upgrade to our current Mobile Mapping SW for MobileMapper 6 users, on our Ashtech FTP site: <http://www.ashtech.com/en/support/> .
