

Addendum to GG24 Reference Manual

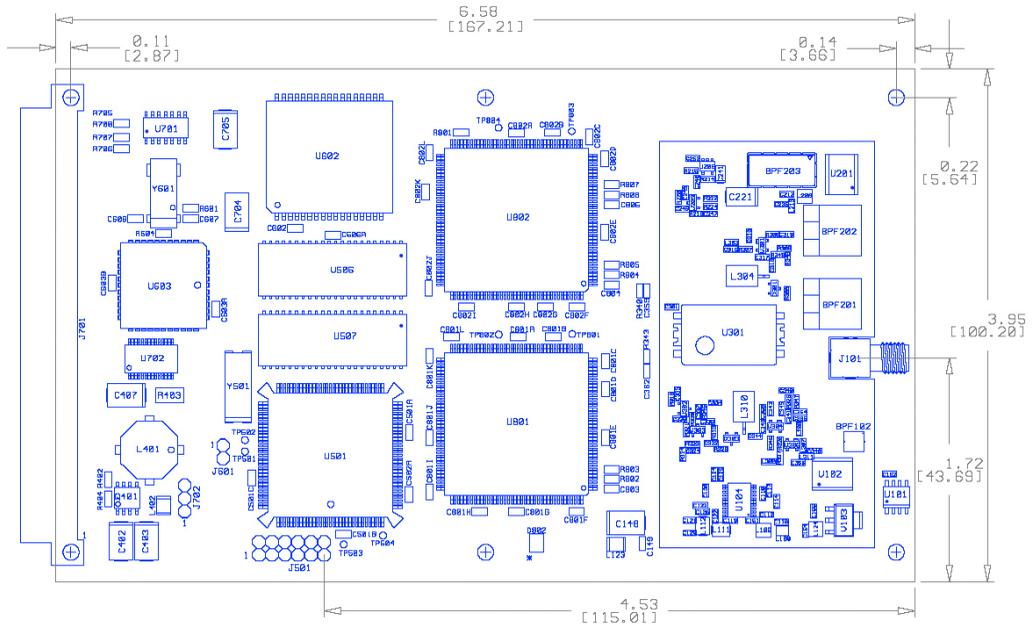

List of known errors:

1. [Board Layout](#)
2. ["Sensor" Version of GG24 Discontinued](#)

1. Board Layout

In the GG24 OEM Board & Sensor Reference Manual (P/N 630098E), Figure 2-1 on page 8 shows the old mechanical design of the GG24. Please ignore this design as changes have been made since then.

The new GG24 board design is shown in the diagram below. This diagram now supersedes Figure 2-1 in the manual.

2. "Sensor" Version of GG24 Discontinued

The "sensor" version of the GG24 is no longer available from Magellan. Today all information provided in the GG24 OEM Board & Sensor Reference Manual (P/N 630098E) about the "GG24 Sensor" is therefore obsolete.
