

Firmware Loading Notice

Survey/Mapping

Date: May 27, 2004

Product: ProMark 2

Subject: Version 2.40

Number: ProMark 2 2004_02 updated

Important Notes :

- Download all data from the receiver before performing firmware upgrade.
- If at the end of the firmware upgrade the receiver stays in "Software upgrade" configuration, reboot it by pressing simultaneously "Mark", ESC" and "Enter" keys.
- After upgrading the receiver screen may be very dark. Switch the receiver Off then On and adjust the contrast to the desired setting.

The customer needs to perform the following steps to upload firmware version 2.4.

- 1. To avoid interruption during the uploading process, use new batteries.
- 2. Connect the ProMark2 to the PC serial port.
- 3. Turn on the ProMark2
- 4. Go to the Navigation mode/Setup/Baud Rate menu and set the baud rate to 19200bps. (If the baud rate is more than 19200bps, the mapgup software cannot find the receiver).
- 5. Run <magup.exe>
- 6. Answer <**YES**> to the question, "Proceed with software upload?"

Upload	×
Updating to version 2.40	
Proceed with software upload?	
YES	

7. The communication with the receiver is establishing

Establishing Communication with Receiver	×
