

## ERRATA - Z Family Reference Manual 630203-01 Rev. C

Please note the following corrections, changes, and additions to the Z Family Reference Manual.

Page 256:

Change NESSAGE to MESSAGE

Page 257:

In the RANGE column for the TYP parameter, add “,CMR+” after “2021”

Page 258:

In the RANGE column for the Message type parameter, add “,CMP” after “CMR”

Page 261:

In the RANGE column of the s6 field, change to read as follows:

PASH = DBEN CMR2 = CMR  
 CMR+ = CMR Plus  
 1819 = RTCM 18/19  
 2012 = RTCM 20/21

In the RANGE column of the s7 field, retain “PASH”, delete all other entries.

Page 276, Table 6.168: Add CMP = CMR+ information to Table 6.168 as shown below:

**Table 6.168. CPD,PRO Parameter**

| Parameter | Description                                                                                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| s         | 3-character string<br>DBN = DBEN output format<br>CMR = CMR (Compact Measurement Record) output format<br>CMP = CMR+ (Compact Measurement Record Plus) output format |
