

# Verizon CDMA

## External cell phone connection to ProMark200

This application note should be combined with the CDMA connection instructions in the ProMark200 platform getting started guide beginning on page 20.

Use File Explorer to browse to the folder

My Device\Program Files\GNSS Service Layer

Run the DialupString program and edit the default dialup string to match the following text:

```
AT+CGDCONT=1,"IP","vzw3g"<cr>
```

Establish Bluetooth pairing – Phone listens. Use the information below and the instructions that begin on page 21 of the ProMark200 platform getting started guide for pairing between the receiver and the external cell phone.

My Connection:

Modem: Bluetooth

Dial-up number: #777

Username, Password, Domain – Leave all these fields blank
