

Determining if your ProMark3 or MobileMapper CE is RoHS-compliant

20 March 2007

There are two ways to tell which type of ProMark3 or MobileMapper CE you have:

1. External antenna jack and SD card slot flap screws
 - a. Pre-RoHS receivers have no washers around the screws
 - b. RoHS-compliant receivers have washers
2. Color of printed circuit boards (visible inside the SD card slot)
 - a. Pre-RoHS receivers have either red or green boards
 - b. RoHS-compliant receivers have blue boards
