Z-Max.Net

MD05

Product concerned

Product Names:

Z-Max.Net

Product Family:

Land Survey

1.   PURPOSE

Magellan is releasing a new firmware version for Z-Max.Net products.

2.   PRODUCT INFORMATION

MD05 corrects a few anomalies reported from MD00 and MD02:

- rover operation in RTCM2.3
- 12-digit IP address
- SBAS=ON by default in RTK mode
- PacificCrest internal radio receiver configuration

The list of corrections is included in release note available on Magellan ftp site.

All Z-Max.Net receivers shipping starting October 1st will include MD05 firmware.

MD05 firmware is available on Magellan ftp site for free download.

3.   CUSTOMER NOTIFICATION

This Product Marketing Update will be distributed to all channels such that they can provide suitable notices to their customers.
