

Firmware Release Notes

GIS

Date: June 20th, 2011
Product: GNSS ToolBox
Subject: New release of GNSS ToolBox V2.0

Introduction:

This document is the firmware release note of the new release of GNSS ToolBox applications released for MobileMapper 10 and MobileMapper 100.

Upgrade procedure

GNSS Toolbox upgrade from the Ashtech FTP site:

<ftp://ftp.ashtech.com/Mobile%20Mapping/>

- Download the required software from the FTP site to your PC (note: this should not be a shared or remote drive, but the local PC hard drive).
- Copy the GNSSToolBox CAB file from your PC to the receiver, using USB connection and Active Sync.
- On the receiver click on GNSSToolBox CAB file for installation

Firmware list and versions

General version number: GNSS Toolbox V2.0

These versions is available on following ftp for free upgrade:

<ftp://ftp.ashtech.com/Mobile%20Mapping/>

New features

1. MobileMapper 10 device support
2. Flying RTK as an option for MobileMapper 100

Resolved Problems

Known issues

- Backward compatibility of new release of GNSS ToolBox V2.0 and MobileMapper 100 BSP version 2.2.4:
 - Both applications are compatible and can be installed on MM100 BSP 2.0.4 with following limitations:
 - **Asian versions do not work with BSP 2.2.4**
 - **Simultaneous use of E-compass and Camera is not possible**
