

# 'MobileMapper Pro™' to 3M Dynatel™ Locator Bracket and Cable Accessory

Adding a Thales Mobile Mapper™ GPS receiver to a 3M Dynatel™ locator automates the collection of marker position and attribute data. The Mobile Mapper Office software tool directly exports .DXF or .SHP files to industry standard cad and GIS applications.

This bracket and cable combination provides an optimized mount and data connection between the Thales Mobile Mapper GPS receiver and a 3M Dynatel Cable/Pipe/Fault Locator with iD capabilities.

- Heavy duty bracket holds and protects receiver while locating
- Bracket holds receiver at the correct angle to maximize GPS signal reception
- Mounted GPS receiver keeps locator balanced to reduce operator fatigue
- Cable is correct length
- Connector includes thumb tightened retention screws, no screw driver needed
- Quick release cable allows connector to stay attached to the locator
- Extra PC connector for downloading to PC, cable need not be removed from GPS

#3MB	Locator Bracket and Cable	\$ 140
#MMP-3MB	Thales Mobile Mapper (PN980598-46) + Locator Bracket and Cable (Includes Post Processing)	\$ 1,890
#MM-3MB	Thales Mobile Mapper Pro (PN980598-32) + Locator Bracket and Cable (NO Post Processing)	\$ 1,178
